

SAN BERNARDINO ISSUES AND VISIONS WORKSHOPS PUBLIC INPUT

During August and September 2021, community workshops were conducted in all City Council Wards to enable the community to express their visions for the state of the City in the year 2050 as input for the preparation of the updated San Bernardino General Plan. To enable those unable or reluctant to attend due to concerns regarding the COVID-19 virus to participate, a separate virtual workshop provided a comparable opportunity for input. In the workshops, participants were invited to imagine the future and express their visions for the state of the City as it has evolved in 2050 for each of eight topics. The following presents these un-edited comments as written on post-it notes and posted on-line during the workshops and are organized by each topic and Council Ward. The comments will serve as the foundation on which a Vision Statement will be written as the "prologue" to General Plan 2050.

Land Use and Community Character	
Ward 1	Safety,Caring,Pride
	Affordable Housing for all,Housing includes ALL forms in language spoken
	"Live, Work, Play"
	What is role of community,be a vanguard for positive econ development

	equitable,"healthy, thriving safe city",homelessness decreased,recreation,greenspace
the community feels welcomed (all ethnicities and languages),inclusivity	

	stronger civic engagement,community engagement,mix use housing,moderate-low income
Ward 2	Integration of community
	Mixed Community
	More Senior Housing
	Safe Streets from homeless
	The community is full integrated in the decision making process
	multi-culture communities
	Community that provides: growth for this city,assets for health and safety,job opportunities,affordable housing
	Residents are able to access transportation easily and utilize as much as possible
	Bus and trains
	Job developments
	Small business with a welcome atmosphere appeal
	Historical Shops- E St. preserve history for yourself
	City
	Mix Use development
	Safe parks
	Uplifting the IE through community engagement
	Diversity; healthy living
	Clean school
	Opportunities for all ages jobs
	A place where we feel safe and are give the opportunity to grow
	Community Benefit Agreements (CBA)
	CBA: Community Benefit; elections
	Restricted area for marijuana smoking; Community benefit agreements (CBA)
	Welcoming center for visitor; CBA; convention center
	Healthy neighborhoods; vibrant parks and people in the streets; community in charge
	yet, up to date courses; wards functioning as communities
	More schools; more housing; more parks; more libraries
	CBA/DDA ordinances that make land use more inclusive for agriculture and housing
	Becoming compost and agriculture
	Parks with a pool and games
	Tenants' unions
	CBA; clean air; pools to practice swimming
	Many multicultural centers
	More schoolteachers of color; more Latino male teachers; more African American male teachers
	Much active youth leadership; diversity and inclusivity
	Eco friendly; community gardens; community garden central; go green city
	More women led projects; many preventive programs; affordable housing
	A place free of pollution; route 66 turns into a bike only road
	community murals everywhere
	Ward 3
large sustainable city,to live work enjoy our homes and neighborhoods	
safe healthy and thriving,transit-oriented development,equitable	
transportation - cleaner - greener energy,community and city hand in hand	
"walkable, green, landscaped",more access to transportation in rural locations,"provide safety, recreation and proper education for our children"	
no sbx,e st has history and should be celebrated	
"provide cultural, educational, economic opportunities and bus services"	
strong history (orange belt),beauty - emphasis on its natural attributes,center has been developed	
more housing/affordable housing,more school and public services,"more green spaces (trees, parks, recreation sites, community center)",less warehouses	

	land uses and community character,the role of the community with the city residents and business
Ward 4	Leadership in county,attractive neighborhoods,strong airport,more home ownership,more higher paying jobs
	Sustainable technological work force and start up hub city
	a city with a managed homeless population,a city with a proportional amount of crime,a friendly city,a city where the population is engaged with its governance
	we will be an all-American city again! We will have pride in who we are! Our children will be proud of where they grew up!
	a historical city that values its history and prone for a vibrant future
	SB will be a city with a transformed reputation-it will be a center for retail,and recreation. It will not be seen as just a city in the "backwater" Inland Empire.,education,entertainment
	industrial growth,skill-set jobs
	skilled workforce,inclusive,equity,diversity
	vibrant,diverse growing community
	an active,diverse,well-educated populace working in high paying skilled job
	the hub to the inland empire
	hub of southern California for: entertainment,industry,transportation,strong families,recreation
	more fun downtown,mixed development
	downtown is now a destination for entertainment
	involvement and feedback,lots of neighborhoods with neighborhood association that meet regularly for shared governance
	a commercial cultural center of IE,compact city with all services easily accessible,electric vehicles have improved air quality,city as maintained a sense of community,Cal state has become one of the best universities in CSU system
	Point of destination,model of city growth and development
	people will drive the 210,215,and 10 not just to pass through -- they will want to visit and even stay and make SB their home.
	new mixed housing,manufacturing,and professional buildings,clean and modern,industrial
	sustainable,high tech,green tech enterprises
	upscale housing and shopping
	housing utilize sustainable design,fire resistive and earthquake proof
	fun bike and walkability
	green,clean,electric vehicles,walkability
	a shady tree lined,pedestrian friendly downtown with art/boutique shops in well maintained historical buildings
	safe place to live and work providing resources to do
both,accessible,shopping,streets,homelessness,county departments and resources,clean,green tree lined streets,good signage,has public transportation available to all-American city,clean streets	
Ward 5	A cohesive community; plentiful opportunities for shopping, eating, leisure; a safer community
	Mixed-use and variety of densities and mobility options; logistical districts; spaces for recreation, shade, and rest
	Leaders and innovators
	Affordable housing
	Rich in history
	All minorities and cultural identities will have an opportunity to have a say and enjoy public spaces; keep our air clean
	More gated communities; UBER, helipads, and taxis; taller skylines
	Mixed-use; high density downtown; low density neighborhoods
	Renewable/electrification standard for SoCal
	No more warehouses; mixed-use neighborhoods; hub of inland empire; high density transit corridors; no more Single Family residence (SFR); high density downtown
	Places for all to visit and gather; shopping and restaurant opportunities

No abandoned/empty lots; land owned by local residents and businesses; preserve historical sites and forest

Retain natural environmental character; entertainment hub; vibrant downtown

Community is engaged in majority, if not all, the decision making processes; transportation is accessible and utilized more than cars; we have spaces with place making model

Community benefits agreement

Smart streets (autonomous driving); affordable housing; no homelessness; open green spaces; shops and entertainment; high rise residential; high rise offices

A welcoming community thriving and benefiting all that come to enjoy its beauty

Mix of densities with waterways/lakes that generate power; artist colonies and recreation centers and training; use of buildings for events, urban gardens throughout

Diverse housing; more nonprofits/orgs with the capacity to facilitate community/social programming; diverse job opportunities; maintained natural/outdoor spaces

3-d printed houses

Duplexes, triplexes, multi-family housing for young professionals; neighborhood community centers for connections; all ELECTRIC; sustainability

Provide: safe, economically viable, diverse open spaces and wildlife corridor

San Bernardino is developed as a recreation center using its mountain access and river access

Community Benefits Agreement

Forest, lands, and lakes entertainment; clean city maintained

Community benefits agreements for jobs and shifting; ordinances to allow for public land uses to allow for food forests, agriculture to have native plants; removal of invasive plants

Who we are as a city: rural community; insured some open space

Urban center; downtown walking center; parks and open space; high density at transit center

Save open space for future generations

The only city in the inland empire with a true, vibrant downtown that has an entertainment corridor; diverse city with a mix of urban, high density areas, and more suburban low density areas

A community of diverse density open and accepting of the variants of arts and culture

Ward 6

CBA: community benefits agreements

San Bernardino is a fun, historic, tourist location with healthy neighborhoods

The role of community is to nurture and nourish its residents through service and opportunity

Major transportation center in southern California; major roadways and airport

Route 66 is a thriving source of residual income for the city; economic center of Inland empire; urban work/live downtown

Boring; sharing caring; cars – flying; high tech; nothing

What is the role of community? Support group for families; investors

Urban with open space (i.e., parks); keep historical landmarks

Blue collar; return to bedroom community

Fine \$\$ absent landlords, make them accountable to their property; occupy empty warehouses

A strip mall where we can eat, shop, watch movies, play games, etc.; party, have fun!

Role of community should help with community watch through building strong community you have support; community should be diverse, full of love and well paid; have time and resources to be civically engaged; what is the community work and home in same; electric transportation; more public transit; bike safe infrastructure

More and updated community centers; clean up historic landmarks; potential to become a leader of employed residents

Every residential neighborhood is attractive, safe, and desirable; competent, responsible leadership

San Bernardino can be a great place that can serve both urban communities and rural communities; preserving nature and the landscape while at the same time having mixed living/business

Strong attractive downtown

A beacon for healthy lifestyle and education

Role of community is to live, work, and play in a city that addresses their needs equitably via CBA focused development (CBA)

mention: CBA for new developments; diverse local economy; green jobs with benefits; new housing; green infrastructure
 community engaged and part of the process from start to finish; zoning reflects the communities input as to how and what they envision for the city; land use is effective and efficient
 create low/moderate income housing in San Bernardino vacant lots
 build productive members of society by having or addressing social emotional, recreational, financial; address financial, social, medical, and physical needs; diverse neighborhoods
 due to all of warehouses the truck transportation is causing excessive pollution; work, live, play in our city; we need community
 should be preserved: CA Theatre, Mt Vernon, Santa Fe Whistle and train station
 safe and exciting downtown with great neighborhood; transportation opportunities to other cities

Ward 7

Seeing San Bernardino flourishing
 Celebrate and preserve the gems (i.e., California Theater, architecture of “Old City Hall”); create a place of belonging and involvement
 We take transportation for leisure, but can walk to our job; community is diverse, full of families, and great food
 Large community; large scale community help and gardening lands
 Development is compact and easily reached
 Profitable retail and cultural activities
 Increase affordable housing and rehabilitate historic buildings
 Nothing but current buildings all around us, we need to “wake up”
 To be an active, engaged community; people, water, education, courage; people
 Affordable housing
 To come together, stick together; reach common goals
 The role of community is to improve housing and overall quality of life of citizens
 To uplift the residents
 Beautiful, historic buildings; plethora of mom and pop shops; affordable and reachable, good to live in SB; beautiful community gardens
 Futuristic with historic elements; major urban center
 To bring citizens together; connect others
 To provide safe, economically viable, vibrant community that people can be proud of and where non-residents will want to be a part of
 City has attracted sufficient number of good paying jobs
 Bike lanes like in San Diego
 A more diverse community with all amounts of small mom and pop shops
 Diverse population; clean, no pollution; walkable bicycle path; little to no homeless, no graffiti, no litter, no property rate
 Service the community; bring the community together
 Create a sense of pride and belonging; beauty and maintained
 Physical form; vast parks; homeless and rehabilitation centers
 Mecca of high tech businesses
 To be active participant with the positive change; horrible; good; none; nothing; unknown
 San Bernardino is the cultural center of the greater inland empire (food, art, entertainment)
 Lively, green, vibrant
 I would love to see SB operate and have a fabulous look such as Orange County; clean, crime down
 Love your neighbor as yourself; help as you can
 Attainable housing with amenities in neighborhoods; preservation of historic buildings
 Major hub of county: business, education, entertainment, shopping
 No racism; better employment
 The form and character is cohesive; productivity; create a sustainable, economically sound community
 Thriving businesses
 I would like to see more homeowners

Look out for everyone, especially the most vulnerable; urban multiculturally, vibrant city; access to a robust public and alternative transportation system and carpool network

Foundation for quality of life; communal needs: safety, share infrastructure, education; nothing food remains

Downtown: mixed-use homes and businesses; residential: newer development

Farming: what is left; very few high rises; more small town safe community; support small business; promote responsible parent; protect land and nature

Urban gardens and farms; clean tech jobs; agricultural tech jobs

To provide harmonized climate for citizens; grow and thrive

Looks inviting; feels safe; has character not cookie cutter approach

San Bernardino has developed as a key hub for high speed rail services; San Bernardino maintains a connection for open space in the region; San Bernardino is the focal city of San Bernardino County; San Bernardino is the chair seat of the county government

Our city learned a great deal from the COVID-19 pandemic and reinvested its resources into a well-paid, benefited, and trained workforce that is close to our homes; We have a public, municipal broadband network that provides high ability and affordable internet for all

**Citywide
(Virtual)**

Capitol of the IE. The role of the community should be to be a great place to live work and play. Role of the Community is to keep the elected accountable. To keep elected informed as to what it is we want/need.

I would like to see its physical and character form much like Rialto, Fontana, Rancho. We need to catchup with these cities. Want to see a family environment, but an entertainment environment. Taking advantage of all those passing through on the 215, 10, 210, 18 and 330

I'd love to see distinct neighborhood where each neighborhood is respected.

Businesses are encouraged to have employees live within walking / public transportation distance (tax incentives). City employees live locally.

City has transformed into multiple micro-neighborhoods; each is self-sufficient in terms of essential needs and transportation.

SB is a regional transportation center for high speed rail and commercial aviation.

SB is a leading city in affordable housing, good jobs, and community benefit agreements for all city-wide development.

the city will be integrated with nature and food production by learning from and working with indigenous peoples

the people who currently live here have not been displace

Environmental core of development in California that is resilient in all areas of community eco- system

Private residential green spaces have diminished due to water restrictions, but the city has developed large swatch of xeriscape and green space for everyone to share. Green spaces are found on every street, every block.

Neighborhoods are linked through quiet, efficient transportation.

SB is a multi-modal transportation hub. Warehouses are directly connected to rail and airport.

Taking a percentage of community input and using community benefits agreements as the standard for development moving forward

Local farms are encouraged.

San Bernardino, resilient leaders in Climate Change initiatives in the state of California

In 30 years, we need to have more public Transportation.

Wide access to locally grown foods and community gardens.

SB is able to balance being a logistics hub for the region while ensuring those who work in that sector have good benefits and salaries. In addition, the logistics/warehousing industry are paying their fair share in taxes and agreeable to community benefit agreements. Lastly, the area is also known for the environmental safeguards that provide clean air, clear night skies (doing away with light pollution) and a way to mitigate urban sprawl.

Neighborhoods and Housing

Ward 1

"affordable, attractive safe housing for single occupants and families", need to be creative and resourceful in determining where this housing will be developed

"residential areas w/ ease of access to commercial areas, recreation, entertainment - maybe hubs of some kind?"
more parks,clean streets,more downtown activities,paved roads,new homes,better lighting
transit oriented development,mixed use housing and business,more healthy grocery stores and restaurants
single family homes,apartments/condos,street lighting/update,cleaner residential streets,restripe roadways crosswalks,repair/update signage,open lots for housing potential
all utilities underground,no powerlines... all gone away
actually home building,NOT apartments
the neighborhoods all have greenspace,not a lot of upward building people over each other... but vertical homes
more parks and recreational space for children to play safely
first time home owner incentives programs,housing near civic and community centers
by 2050 the biggest portion of SBs new housing is being built right downtown,retail and office blocks are opened up to mixed use developments of all sizes and styles
across the city and all wards mixed in all commercial zones for small businesses or allow for in home kitchens
SB offers a diverse selection of housing opportunities that provide homes for people seeking to live in the city,SB has streamlined zoning to provide access to novel and cost effective methods of home construction
"affordable housing near parks, schools, community services"
funding for community shared resources,land use ordinance changes for garden parkways,community centers,in home kitchen businesses,street vendors
community events,neighborhood assoc.,friendliness,nice houses,new community centers
low income low-low income housing for single parent and low income families
"SB encourages home development that provides access to a ""15-minute city"" and open space for everyone"
downtown housing will consist of high-rise and mid level housing,"wards rebranded with are names like ""verdemont heights"" and ""west end""",an attraction has been developed in downtown that is a revenue generator - ex. kidspace museum
it has not and im tired of pretending that it is or its marketed as such
new housing built in downtown,existing abandoned housing restored
our neighborhood and housing,pedestrian path,walkability,design with open space
reflecting the econ. reality,where housing is a right,where families can afford to live while allowing time to spend with other families,"nutritional affordable foodstuffs could be more accessible and affordable instead of having liquor stores/marijuana shops, etc"
mix use housing near public transportation and commercial entertainment,eatery access
development in the central city,single family homes,new shopping/grocers,sidewalk repairs
maintain and improve traditional neighborhood (ie del rosa),themed community housing that creates intention/focused image,mixed use res/retail/commercial DWT,"location of resources in each neighborhood - water recycle, groceries, entertainment",attention to cultural makeup
single family,mixed use,sustainable housing development
multi family/community housing,adobe/modular,the idea of single family housing is not sustainable and will kill california
"affordable, attractive safe housing for single occupants and families",need to be creative and resourceful in determining where this housing will be developed

maintain and improve traditional neighborhood (ie del rosa), themed community housing that creates intention/focused image, mixed use res/retail/commercial DWT, "location of resources in each neighborhood - water recycle, groceries, entertainment", attention to cultural makeup

single family, mixed use, sustainable housing development

multi family/community housing, adobe/modular, the idea of single family housing is not sustainable and will kill california

Ward 2

Develop in areas of land or in the apartments need to be rebuilt due to unsafe structures

mix use development

Townhomes, Single Family House, Walkable Alleys

Gated Communities

More need for affordable housing, new housing is needed in the wards that need it most

Single Family Homes with space for yards for children to play, affordable

We need to build up

Community benefits agreements

Better types of housing

Housing for homeless

Community gardens

Affordable housing

Affordable housing for those in need-

make use of vacant land to build affordable/diverse housing options

Nurseries for children

Just housing for the entire community; government outside of corruption; CBA

More officials; security plan; moon planet, earth planet, ocean planet

Walkable neighborhoods; housing up to code; rent control; increased homeownership

Intentional zoning

Housing for those in need

Affordable housing

Zoning department; CBAs

All documents translated, especially lease agreements; eco friendly housing

Low-income buildings/housing
 Affordable housing in a well-developed downtown area
 Low and middle income housing; CBA
 CBA; tenant unions
 Build up (housing/ parking structures; art in mind
 life
 Affordable housing requirements; CBAs
 Equal housing; CBA
 CBA
 Affordable housing, doesn't criminalize felons
 Adobe housing; ethical tent cities
 Housing centers and cheap housing
 Walkable neighborhoods with safe walking paths; affordable small homes
 Pools, gyms, CBAs
 Secure housing; parks; improved roads; CBAs
 Safer streets; CBAs; more plants

Ward 3

often new development is influenced by market conditions and this is a (?) to overall development
 mixed housing for different stages of life
 higher standard for housing development,cleanliness,"consistent rules (block walls, little neighborhood markets)"
 you have to drive so far even for coffee
 high density and mid density housing surrounded by plazas and courtyards,rooftop gardens and outdoor community areas
 transit-oriented development,mix-use housing development,downtown housing
 gathering places,courtyard/commercial
 clean safe beautiful,allow families to thrive,quality homes,"green spaces, less pollution"
 multi-generational housing,development with greenspaces/parks nearby
 new housing and affordable,"improved communities (streets, sidewalks, etc)",more lights
 affordable housing and senior housing,throughout the entire city,neighborhood watches
 not close to industrial and warehouse

Ward 4

walkable gathering places,shops,evolving housing (youth,seniors,families)
 upscale single family housing and attractive landscape,quality multifamily housing
 we need strong neighborhood groups,neighborhood watch
 middle to upper class neighborhoods that are in walking distance to safe parks,schools,and nature trails and shopping
 neighbors watching out for neighbors,more single family owner occupied homes,fewer apartments
 affordable housing for single families,apartment,townhouses for young families,lush landscaping
 pedestrian friendly,small type transit shuttle buses instead of oversized buses
 SB will have neighborhoods with safe,attractive,and affordable housing,these neighborhoods will also serve as hubs with access to commercial/recreation/entertainment
 mall and living space with good security
 people know their neighbors! They interact and communicate. They share joys and sorrows. They look out for each other and all children and elderly.
 quality multiuse buildings-including condos-apts-commercial services-groceries-entertainment.
 parks with a water feature for serenity,housing community of single story houses,not so many McMansions,lots of neighborhoods that have neighborhood associations that meet regularly for shared governance,central park areas for picnics,outdoor concerts,art shows,outdoor yoga or other exercises
 educational attainment areas and resources,these neighborhoods will be located across the city-not just in one concentrated area
 restore historical homes/buildings,single story family homes,nice apartments-well kept,theaters,shopping centers,schools,parks

new housing should be similar in size and density to existing housing nearby so as not to reduce the value of existing homes,code enforcement needs to be aggressive in existing neighborhoods

affordable housing would be developed around the newly develop carousel mall area.

quality,well designed homes-both single and multifamily,many older commercial land uses rezoned for housing,all residents live in desirable housing and safe streets

types of housing familiar to the replacement of waterman gardens,nice apartments and condos

Ward 5

Balance of nature and housing; low density housing

Affordable, beautiful/well maintained; sidewalks/parks/greenery

Available and accessible housing for youth, people with disabilities, and elderly

Affordable housing based on individual income

Parks with trees, fields, bathrooms you walk into and aren't locked

Well maintained buildings and streets

Housing for students at affordable cost (less than 1k rent please); mixed use housing in downtown; more shade and trees; single family homes outlying area of San Bernardino; condos in downtown and airport

Low density and high end housing

Clean neighborhoods and nice yards

More housing in the foothills

Condo housing along the freeway

Downtown housing high rise buildings with condos of assorted sizes on the top portion, commercial in the lower middle, and retail on the bottom two or three levels

Retain the historic building while incorporating new style dwelling in open space

Downtown has high density mixed use development; university area is build up to be a true college district, same for valley community college area; 215 between Devore and University has been widened

Allow high density housing in SFR zone; no development along hillside; allow mid-range housing

Multiple families housing separate from industries

Need more affordable housing; senior housing

Preserve historic housing and building; affordable home purchase opportunities

The majority of housing will be owner-occupied

More high density housing downtown

No more warehousing

No new SFR

Problems with too high density, compressed housing resulting in tense living and crime increase

Transit oriented development; solar; safe

Find the finding of the grant that was for the homeless? And help vets as well

Community benefits agreements: allowing for development of affordable and mixed income housing as defined by regional housing needs assessment; permitting for new housing models; co-ops, eco domes, tiny homes, storage containers, earth shops

More duplexes affordable for single individuals/ young professionals; residential neighborhoods away from industrial warehouses/sources of pollution

Various levels of housing intertwined (i.e., high end or low end); no more than 3 stories

In downtown 50 du/ac units

Houses will be able to cover 35% of the lot sizes; this will facilitate w/multiple generation living there

Tall apartment and condominium complexes; renewable water resources

Ingress and egress on the north end; utilities, sewer, and water

Prioritize live-in property owners! Stop predatory cash buyers for income properties; tenant rights unions; community oversight on new and existing multi-family buildings; community benefits agreements

Ward 6

CBA: community benefits agreements

new housing will be developed on all empty lots; community will need parks, schools, housing, businesses, colleges that are able to fluidly exist

senior housing apartment buildings with designated amount of affordable housing

housing is affordable; open space with gardens; mixed income housing; create mixed use spaces to live and work at your business; tenant protections and education

what is it, physical form and character? consistent-building align with vision

prioritize low income housing

CBA community benefits agreements; accessible, affordable housing and alternative housing models based on community needs and surrounded by green space and health focused zoning

What types of housing? One that all neighborhoods have a good place

Housing-some multi-use but with parks and landscaping; no more than 3 stories; no multistory in single family neighborhood; more landscaping

Mixed housing and businesses; increase ADU housing; housing for young couples

Containers for homeless community; well designed a sufficient to meet the needs of transient populations

Affordable housing surrounded by resources and programs for families

Tenant protections; city wide housing assistance

Parks; well kept homes; clean streets; entertainment

Housing can be a mixture of housing that can be sustainable for our environmental landscape (ex. Dome homes); mini houses and mixed living spaces

Master planned neighborhoods

Housing: single family with allowed ADUs; strong policy for parking

Stable, attractive neighborhoods; good schools; safe streets; desirable housing for all income groups

Long time residents spend your money where you live, not where you work

Luxurious, but cheap

San Bernardino is full of active neighborhoods associations who watch over our community members

Diverse housing overall; build up

Single family green homes; moving sidewalks; integrated senior homes with college students; separate areas for multifamily buildings that are mixed use

Less fences; more community centers; more community hubs; alternate housing; cal earth homes; tiny homes

Affordable housing for residents; universal home design for long term living

Ward 7

Affordable housing and clean community parks and centers

More senior housing

Housing is virtually guaranteed for all neighborhood centered organizations exist that help with living expenses and care; strong community relationships are encouraged

Where will housing be developed: out beyond Devore; affordable housing with schools and monitored services

Housing within close proximity to metro/airports

Senior communities, multi-use housing, new housing, new development

Streamline affordable housing; new construction approval process by right without review of plan that meet standards; eliminate DIF, permit, entitlement fees for affordable housing construction

Affordable housing; land developed for community activity and gardens; lush and green areas

Multi-family with amenities on site (i.e., parks, small business, etc.)

Low cost high density; post pandemic hygienic apartments

Beautiful functional linework; historic preservation; greenery

Affordable housing; coop/multiuse housing

New senior housing homes such as Sun City; housing for low-income

Clean, safe, affordable

All neighborhoods possess attractive, quality and affordable homes

Tiny homes; casita corridors for families

Housing must be limited to ensure O.O.L.; Neighborhoods should proved all services with no or minimal transportation: parks, groceries, restaurants, shops

All kinds of housing (affordable to high end)I would like equestrian amenities (trails, parks, etc.)

Parks, activities, walking, eateries

Allow zero lot line construction to make more efficient use of land

Affordable homes; new schools; community centers

More homeownership opportunities; allow carpools or single tandem garages for SFH; more homeownership opportunities by allowing for simple very small lots (2500 sq ft) without HOA

More affordable housing not only rental but real programs that address our communities' challenges

Provide CASCA: Clean-free of harmful things; Accessible-by transportation services; Safe-low crime, pollutants; Communal-social networks, intergenerational; Affordable-to own/rent with utilities

Housing all over; single family; tiny houses; affordable

Housing is affordable and attractive; near parks and community get together; our historic buildings are kept up and some are museums; designed to be accessible and safe

Neighborhood level maker spaces to develop skills in housing; innovative housing, eco friendly materials; community gardens

Affordable and upscale; infill; community unity-neighbors caring for neighbors; intelligently

Single family houses; small, tiny home community as an option; pallet housing-one in Rach ward for homeless transitioning; better layouts

Strengthen the role of neighborhood leadership and pride; support cleanup campaigns

Multigenerational homes; senior houses; no more apartments

Homelessness nonexistent; community program improve homeless, etc.; refurbish older homes etc.; safer feeling in downtown areas; maintain direction; elect enthusiastic politicians; well maintained

Inclusionary housing that is proportional to the income levels of our residents; expansion of ADUs, especially in single family zoning areas

Economic, affordable, and safe

Big luxury houses north end of SB

A real variety to be serve community need where mix with work and shopping

Close to schools, churches, parks, Mountains, recreation, at affordable prices

San Bernardino has developed a plethora of housing types to ensure that everyone is able to afford; San Bernardino is innovative with housing types for multifamily living; San Bernardino has developed nodes of 15 min accessibility

**Citywide
(Virtual)**

Housing will be concentrated around transportation hubs.

I want to see single family housing. A place where you can walk out at night. No more apartment

Multi standard residential is abundant. Large single family homes are intermixed with senior, multi-unit, and low income.

Community ownership of land and businesses

Housing is encouraged above (second floor) retail, such as groceries, restaurants, and other essential services.

mixed use with mixed income neighborhoods and increased density

Single family neighborhoods with a diverse income stream and not all poor people in one place.

Community arts and cultural development are just as important as economic development and developers are required to provide a percentage of fees to support community priorities

Mixed use real estate allows for local and small businesses to flourish, walking distance from where people live.

Circulation and Mobility

Ward 1

bus opportunity,alternate transport opportunities,bike- scooter - electric vehicles

carpooling/rideshare lots,busing public,bike lanes,shuttles

cars/electric,train,subway,bus

electric car charger access,incentives for residents to switch to green energy

"infrastructure to support ev ""vehicles""",hydrogen vehicles,"""hv"" vehicles",solar centers

birds... more birds... scooters,micro mobility

zero emission vehicles,bike paths/trails,"less cars, more public transportation",more walking trails/paths

	<p>the incentivization of newer/experimental modes of travel like the hyperloop,along with clean energy vehicles that are efficient</p> <p>increase access to public transportation,green infrastructure</p> <p>local bike paths to DTW w/ air and water stations,more mass transition into neighborhoods DTW and BTW cities (green energy),more hydrogen charging stations for cars</p> <p>need to greatly develop public transportation options building on what we have,need rates/networks that can reach into as many areas of SB as possible</p> <p>sbx,metrolink,bike paths (we need dedicated bike lanes)</p> <p>trolleys in our college districts,sbx dividers are gone!,expansion of light rail</p> <p>SB is a hub on statewide and regional HSR network</p> <p>"still dominated by personal automobiles, but they're mostly electric",sbx busline runs every 5 minutes and serves many thousands of people each day</p> <p>SB int. airport open for passenger flights</p> <p>carpool,freeways</p> <p>SB has developed a transportation system that prioritizes the movement of people over cars and tackles car supremacy,SB has eliminated all traffic deaths within the city,SB is traversable in a safe and timely manner by transit</p>
Ward 2	<p>Planes,Tele transport (Star-Trek),Solar powered vehicles,buses,walking distance,freeways,train</p> <p>Driverless electric vehicles</p> <p>clean technology & ZEV</p> <p>More charging stations are needed,working from home helps</p> <p>More bus usage</p> <p>More bus routes</p> <p>More frequent routes; CBAs</p> <p>More bus routes</p> <p>CBA/DDA; Electric vehicle policy and infrastructure; protected bike lanes</p> <p>Community benefits agreements</p> <p>More bicycle usage</p> <p>Community electric charging stations; parking garages for multiunit housing</p> <p>Train station and busing; cheaper automobiles, electric cars</p> <p>Bike lanes; shared electric vehicles</p> <p>More bus routes, affordable</p> <p>streets have been finished up by their trailers/trucks</p> <p>Electric cargo trucks; electric buses</p> <p>DDA</p> <p>Bikes, Bikes, Bikes! No cars in downtown</p> <p>Build metro above ground level or underground; better metro/bus routes; bike lanes/trails</p> <p>Transportation that reduces greenhouse gases,less pollution,electric vehicles</p> <p>Commuter Rails- and public transportation,electric auto</p>
Ward 3	<p>more transportation,more electric cars and charging ports,more bike lanes/accessible (rent) bikes for community</p> <p>more hydrogen/electric stations,public transport (clean energy),airport open for commercial flights not just freight</p> <p>electric bikes,walkability!</p> <p>electric vehicle cahrging stations throughout downtown,"ridesharing stations for smaller, local trips"</p> <p>"zero emission cars, trucks, all types of vehicles and transportation","more accessible active transportation - bikes, metros"</p> <p>electric scooter (seen in major cities),trials(?) health,bike lanes</p> <p>recharging stations,alternative feul availability (eg hydrogen) clean public transit</p> <p>bike tracks for children and adults,metrolink throughout city,create more roads</p> <p>"streets pedestrian friendly to encourage walking, bike riding",smaller buses to shuttle people (no sbx)</p> <p>more alternative fuel vehicles,better roads,more public transportation</p>
Ward 4	<p>quality public transportation opportunities for the public</p>

public buses,bicycle lanes,walking trails,shuttle/local train system to reach outlying areas
 light rail for area,strong railroad,passenger airport
 San Bernardino will be the center or hub utilizing the train station,and transit center,sbx
 if you want people to walk and bike to work and shopping,city corridors need to be safe,and well lit so
 people feel safe living near businesses.,clean
 train to the mountains,electric cars,no sbx
 electrical recharge stations conveniently located,hydrogen fueling also easily availability
 SB will have increased public transportation,we already have Metrolink and systems within the city,but
 networks will be more developed,we will also have many more bike lanes in different neighborhoods
 more local bus routes,lower SBX bus footprint,bus is ok,but permanent infrastructure and works prohibits
 left turns are public and business unfriendly
 circulation and mobility,public transportation within walking distance of all neighborhoods,pleasant
 walking areas
 pedestrian friendly walkway,bike or pedocycles pathway,shuttle buses instead of oversize buses to
 transport from neighborhoods to local destinations
 Trains! Electric and hydrogen autonomous vehicles,electric buses
 maybe inner city trains like they have in Europe
 Safe public transport and local airport to vacation destination
 transportation hub,airport rail

Ward 5

Green, renewable energy
 Better access to transportation for people with disabilities
 Flying taxis and drones
 Less parking lots, take up too much space
 Walking paths and trail; more/better public transportation
 Public transportation; electric vehicles
 Protected bike lanes; truck routes from sensitive uses; charging stations at public parking; vehicle shore
 (electric); complete sidewalks with shade
 Walkable narrow streets; autonomous vehicles
 University areas and downtown area have trolleys; SBX is gone
 Cargo routes will be defined and built/updated prior to warehouses being built; trucks are clogging and
 destroying roads
 Off road trails/roads
 Accessible trails, sidewalks, bike paths for people with disabilities
 Electric cars
 Pilot programs for electric vehicles
 Community benefits agreements allowing for: EV infrastructure, electric truck/bus/train conversion, bike
 paths/lanes, pedestrian/business friendly development, and land use-mixed use land
 Expand freeway infrastructure
 More trains available
 Hyperloops throughout the city
 Intelligent bicycle and electric paths clearly marked and expanded
 Bird scooters and E bikes
 Electric bikes access to all
 The bus line finds a new place to ride through; monorail
 Public transportation emission free and passenger airport
 Better roads and freeways
 Green/eco transportation; designated bike/pedestrian walkways (like Rancho); CBA
 Walkable, bikeable cities
 Smaller busses but more of them so we can depend on them; better zoning admin
 Self-sufficient neighborhoods; rail; bus; autonomous cars
 Electric trucks; restricted (responsible) goods movements; Venice beach type bikes lanes across whole city
 Transporters star truck

Ward 6	Shuttles, teleporting
	CBA: Community Benefits Agreements
	Green Transportation and affordable access
	Autonomous vehicles for carpooling (company carpooling)
	Electric Transportation; fixed roads; more access for people with disabilities
	No more warehouses as they create more traffic locally
	All forms of transportation provided and available for all wards etc., trains, bus, cars, etc.
	Circulation & mobility; mixed transportation (trolleys, trains, public transportation); bike routes and walking routes for health benefits; our city is big enough
	CBA community focused solutions
	Less reliance on diesel and shift toward electric and other clean energy transportation; connectivity and accessibility highest priority
	A car that can levitate and hover speed through traffic with beaming lights and can drive itself you can watch movies and it'll come with wifi
	Bullet trains for commuter transportation and improved into city delivery
	Trains; electric rail/trolley; bike paths/safety infrastructure
	Electric vehicles
	Desirable public transit for shopping, work, and school
	Walking, cycles, electric vehicles, solar moving sidewalks
	Very good transportation system with cars, buses, and rail services
	City divided into sectors, each area-all needs are met within
	Low-cost; healthcare available to all; complete streets increase traffic safety; good nutrition is accepted by all
	Ward 7
Better busing, trains, and freeways	
More robust and efficient travel that connects the city; more public transportation	
Most people walk to school, work, play	
Few personal cars; on demand trains; shared cars; reduction of transit corridors; most areas have limited vehicle access	
More efficient public transportation	
The pacific electric railway is reconstructed, providing affordable and reliable public transportation throughout SB and the IE	
Better transit center-more buses; use of airport for travel, not just commercial	
We have trollies to go out to bars and downtown; buses are clean; more bike lanes to share our roads; airport is for everyone, not just amazon	
Better transit systems; rental cars (commuters)	
More electric shuttles/buses	
Transport need to interlink; home deliveries new and growing	
Airport up and running; more carpool/toll roads	
Better system; affordable	
Solar bikes	
Expansion of Omni trans, Metrolink, and carpool network to reduce pollution; more clean transportation vehicles, electric cars, buses, and trains, planes, etc.	
The implementation of the Metrolink rail line. Uber and lyft drivers; city buses	
All vehicles are electric	
Bike lanes plus integrate bike paths	
Air transport improved; improved public transportation; improved rail: more routes, more frequently; citizen patrol working with police department	
Trolley; walking/bike paths that are safely comingled with nature; small van/bus that are electric. Natural gas; mag-lev like Disneyland	
Bike paths; higher walkability; equestrian trails; light rail?	
Underground train; less automobiles for driving on streets	
Toll roads; bigger freeways; more diamond lanes	

Adequate and attractive public transit is available across the city
More trains and buses; more highway; wider roads
Transportation technology depends on population, jobs, location of goods; light rail
Public; unknown
High speed rail; efficient and effective city buses
More safe routes
BART system (San Francisco)
Electric Vehicle charging stations are easily available across city along with hydrogen refuel stations
San Bernardino has continued to develop transit options; San Bernardino has tackled car supremacy; San Bernardino has enhanced the mobility of non-car modes to be better than a car
Need bus shelters and seating; attractive not subject for tagging; need bus lines and frequency that are more convenient
Create E/W SBX line
Trains more efficient for longer travel; electrical vehicles for short distances across city (intercity shared cars)
Electric shared (Zip cars)

**Citywide
(Virtual)**

Community ownership of land and businesses
not sure what to expect, but we need to take in consideration ADA/special needs/old folks in our travels
More priority bike paths or combination of bike and sbx paths. incorporating art into crosswalks, higher density housing by alternative public transportation; development that builds on pedestrian walkability
Transportation will largely be automated, self-driving.
We are in California we have to commute. However, with the pandemic we learned we can work from home and not have so many trips.
bikes, mixed use with high density surrounded by open space. linear parks that serve as multi modal corridors
Earth Friendly Transportation!
I like zip cars
Shared electric vehicles. Close access (within walking distance). Rent by the hour.
earth friendly transportation
we need to make sure we build houses using sustainable infrastructure moving forward and addressing the climate we have natively and increasing employment opportunities with apprenticeship programs. & BY THE WAY these are all able to be included with a CBA. Additionally building tenants unions and community housing/wealth
Neighborhoods should be self-sufficient. Access to groceries, restaurants, essential services.

Economic Vitality

Ward 1

the economy determines our budget for spending or investing in our community
community benefits agreements for every project
many CSUSB students stay in the area b/c there are many jobs available to them
strong sales tax revenue,TOT tax
tax the rich,prop 13 reform
more work from home jobs,green jobs (energy),space related jobs,partnerships with universities for certificate/job training for future jobs,prison to work programs that incentivize hiring former convicts,entrep. program,healthy mix of large industry and small /medium businesses
contributors of the cities economy... organic foods
"the city has a diverse range of economic drivers including: technology, transportation and logistics, and medical",the diverse workforce opportunities allow for a higher tax base and greater retention of our college students living in SB
environment/climate the composition of our city's economy of money flow
more \$ being brought in b/c of organic growing gardens
economy booming,small/family owned businesses,technology/app building,web design,makes for better sustainable lives of SB residents

food vendors,artists,warehouses,gig workers,construction workforce,warehouse industry,logistics
 higher education access to provide high paying jobs
 SBD develops a diverse economy which retains graduates of local institutions,SBD provides a range of employment opportunities for people of all skill levels,SBD employers provide living wages or better to all employees
 Industrial,tool and die,skillsets,blue collar,employment opportunity ie bevernje (?) industries
 people who live here work here
 "in 2050, the cities economy is centered around a vibrant downtown featuring entertainment, creative offices, live-work development, services for the whole region", "industry is mostly automated, and more people work in ways that beautify the world and the community"
 where a living wage is implemented in any job,in addition of city/county/state/fed. based universal basic income program,"allows people to choose the job, industry, or business that best suits their talents and skills"
 smog control,more jobs,city week,events,affordable housing,community
 producer of needed goods throughout the world,top gateway mountains,thriving downtown,shopping holidays,entertainment/center,family fun
 reserve greenspace,shade equity,park equity
 businesses to support the development,financially solid,eco friendly,contributors: business and community
 no more warehouse jobs,improving tax codes
 airport,downtown,government,casino,education institution
 tech jobs,hospital,government
 businesses (employee/spending),institutions,school district,city staff,county staff,warehouse workers,gig workers,vendors,artists
 ideally a healthy economic climate,"major contributors will include gov't and educational institutions, and commercial entities that see opportunities in the inland empire (we're not a backwater)"

Ward 2

Logistics HUB
 Need more taxes from businesses like amazon and get own fire department back to city,support and help small business sector,especially downtown,get congress what his name (IDK) to bring more funding
 Porto's Bakery,vivacious/lively downtown,nightlife,food trucks,fun centers,well-paying jobs
 well-paying state,federal,and county jobs
 bedroom community,logistics hub
 climate of opportunities and growth
 healthy food businesses,incubators and a good start up economy
 Local jobs that can pay living expenses; more e-jobs for driving; bigger outreach
 Economy is prospering
 Agricultural focus
 Big businesses pay taxes just like the community; CBA
 More small business loans
 More investors in local businesses
 CBA/DDA/Non-utility tax; small business incubation programs and grants; universal basic income
 Tax warehouses; warehouses have to pay money to communities
 Amazon pays local taxes
 Community benefits agreements; union jobs
 Union jobs
 Small business support; more small businesses; CBA
 Sustainable, community-based businesses; Zero waste business
 Small businesses classes
 Jobs with livable wages
 Culture opportunities

Ward 3

import hub,airport,travel,jobs
 Downtown passenger airport,universities collges

	<p>logistics industries have stimulated a strength in robotics`</p> <p>citys economy is thriving,local universities produce college graduates who stay and work in the areas,retail/technology,art and entertainment,gov't sector,clean environment and preservation job,vocational and college job</p> <p>downtown area is thriving with a mix use of new and old buildings</p> <p>the money generated helps improve streets/helps improve and renovate old buildings/land,"contributors - casino, open to big companies"</p> <p>equitable economy,grants for small businesses,good jobs with livable wages,more opportunities for startup companies</p> <p>more larger corporations providing higher paying jobs for the residents,thriving restaurants and retail,both large and small businesses,residents spend their money in the city</p>
Ward 4	<p>Higher income level and education of the population</p> <p>job creation for good paying jobs with benefits and retirement through local skilled and trained language on projects</p> <p>economic vitality,more shopping opportunities,small businesses,fewer national chains,jobs in technology</p> <p>major economic players will continue to be important to SB's economy (e.g. state,csusb,the county gov.),additional retail and entertainment players will come to SB to contribute to our economy</p> <p>local economy focuses on healthcare and medical technology,education and skill levels have been improved so many social disparities have been eliminated</p> <p>good jobs,good shopping,good housing all in the city,entertainment</p> <p>healthcare jobs,education jobs,work from home jobs,develop more specific career path training within all our high schools</p> <p>need more retail to increase tax base,encourage more businesses with lower taxes and increased safety,use tax base to reinvest in city infrastructure</p> <p>tax base</p> <p>place for legitimate business to operate and employ local residents. All types service,tech,construction,restaurants</p> <p>cannot become viable again until homeless and crime problems are properly addressed</p> <p>need strong economy and tax base,good paying jobs (high tech?),good services available to residents</p> <p>productive jobs at every level,beginning entry level to professional,large companies as well as small business owners (not street setups)</p> <p>the city will thrive around the development of the airport passenger status. Hotels,malls,gift shops,and restaurants</p> <p>established,long-term infrastructure,base line economy to support and to foster retail and private enterprises,sustainable</p>
Ward 5	<p>Green renewable energy</p> <p>More business</p> <p>Better paying jobs; keep our college graduates here with good jobs</p> <p>Downtown, Airport</p> <p>Green manufacturing</p> <p>Stores and businesses move back in providing jobs within; internships of all levels</p> <p>More career and skills training for youth and adults; apprenticeships; more small businesses; small business support</p> <p>County seat; government services (city, county, state, federal)</p> <p>More high end housing for tax basis</p> <p>Livable minimum wage; local micro-economics; it'll be more expensive to live in</p> <p>More business development; developer interest to build more retail stores, restaurants, etc.; the city economy will not be reliant on marijuana</p> <p>More public/private partnerships; incubators; more small business assistance</p> <p>Restricted truck routes; enhanced infrastructure; finance district (EIFD); for all ages; developer funded upkeep</p> <p>High tech jobs; a more diverse community</p> <p>Small businesses</p>

Increase human services job opportunities (i.e., nonprofits, community organizing); increase research/academic (job) opportunities

Growth; business; affordable

Community benefits agreement informed; small business incubation and loans; rental assistance and tenant education; grants for environmental conversions

Blade runner; high tech jobs in tall buildings

We have a thriving and diverse local economy; we have fair wage jobs; we have training for a diverse workforce

Local businesses

Invest in retail/commerce/hospitality food service

Tech companies have migrated to San Bernardino creating higher wage job opportunities; innovation hub has been created to invigorate entrepreneurship

Training and school with apprenticeship with grants and events, like Route 66

Robotics job

Opportunities for graduate; livable minimum wages; more emphasis on vocational\technical than college debt

“encourage” small business; lease open land to farm

Job training; more businesses

Opportunities for high school: volunteering and college mentorships to retain working opportunities

Balanced budget

More robotic workers and self driving trucks

Majority of businesses owned and ran by the community

Local business opportunity with education

Technology and manufacturing partnerships with our local college and university

High road careers; union hall; small business support (incubator); green infrastructure and manufacturing; solar manufacturing

Ward 6

Train system

Community benefits agreements to allow for local construction, labor jobs, and investment in local businesses to keep money circulating locally

Tax amazon local tax for use of airport and warehouses in San Bernardino (CBA)

Diverse economy and workforce; training that offers job placement varied; incubators; green economy and sustainable

Restaurants; warehouse; grow house for food/ weed; engineer/cybersecurity coding; tech jobs; museums; incubators; green jobs; childcare; art/creative economy; local manufacturers

Rent & home payments; equal salaries; minimum wages-minimum rent and house payments

Make SBPD pay for lawsuits on use of excessive force from their budget

CBAs; be union friendly

Tourism; education; solar innovation

Small business with support

Farmers markets; desert gardens; jobs that are sustaining our economy/environment; let’s get creative; indoor gardens; engineering environmental jobs; let’s use our resources/landscape for the good

Vendor/entrepreneur friendly process to be compliant and safe in selling their product while paying taxes

Vocational training; leader of employment education

Many successful businesses for jobs and local leadership

More white collar jobs; more skilled jobs

Need business development; developer interest; creation of jobs

Encouraging small business; community investments; Cal state job influence; creating more able workers

Small businesses; city farmers markets; total transparent governments; cultural districts

Jobs available for community residents! Food/restaurants, warehouse development, professional, etc.

City’s economic climate is thriving; jobs-entrepreneurship; smart-city ideas, and developments draw youth to our city; high-tech

	<p>CBA's for major construction projects for the city</p> <p>Economy would display our array of businesses, welcoming equity through planned development and small businesses are the lifeline of the city. Economic corridors for entry opportunity</p>
Ward 7	<p>Great home healthcare</p> <p>We have living wage jobs; new businesses; better economic strategy to build up; clean up city</p> <p>More schools: trade, charter, community college campus locations</p> <p>Currently poor; livelihood</p> <p>Business friendly city</p> <p>Diverse categories of well-paying jobs; trade schools to train needed workers</p> <p>Small business accelerator and incubator; need more small businesses that competes with big box stores; give attention to customers</p> <p>County produced jobs; having stable job opportunities with long term benefits</p> <p>Huge minimum wage job</p> <p>Jobs need to include more trades-pay better and make things</p> <p>High paying jobs in technology</p> <p>Business accelerator to help small businesses</p> <p>San Bernardino has leveraged CSUSB and its proximity to other universities to foster an economic environment attractive to new graduates; San Bernardino provides a diverse base of employment</p> <p>Job training to help us have long lasting jobs; mom and pop shops are everywhere attracting people to our unique city</p> <p>High road jobs; good paying clean tech job; computer and technology</p> <p>Low poverty rate; low homeless population; more skilled/trade school jobs (i.e., massage, chef)</p> <p>A combination of big and small businesses and restaurants</p> <p>Sustainable, logistics, clean tech, advanced manufacturing; AG tech</p> <p>Balanced mixed: blue collar, white collar, tech, manufacturing, service jobs; good economy fuels; little to no out-of-area community</p> <p>Family oriented; attractive</p> <p>Rebuild downtown with restaurants and retail shopping; hotels</p> <p>Wage increases; more jobs</p> <p>Private and social services program</p> <p>Downtown businesses have grown, and jobs are plentiful; jobs are high tech and thriving</p> <p>Technology; trades; transportation</p> <p>Over 60% of the city's annual budget goes toward policing; the city needs to invest more funds into public/community entities (i.e., parks, CBA's, libraries)</p> <p>Push higher education; make it affordable for all citizens</p> <p>Rebuild downtown; better career opportunities</p> <p>Child development centers focused on STEAM; corporations</p> <p>We have a surplus; the community is overwhelmingly involved</p> <p>Government jobs; corporate jobs; incentives to hire locals</p> <p>San Bernardino is a cultural center, tourism is encouraged, and our multiculturalism is celebrated via businesses such as restaurants, galleries, nightlife, etc.; transportation provides to our economy (trains, airports, etc.)</p> <p>Healthy; people have good work ethic; small business; SB was city of stagers, Harris, etc.; smaller social welfare-community cannot carry anymore</p>
Citywide (Virtual)	<p>higher density housing by alternative public transportation</p> <p>Business friendly. Tech jobs.</p> <p>better recyclable strategy</p> <p>green jobs. coop spaces for local businesses. no warehouses.</p> <p>A big change in our policy and procedures with city to allow more business to build in the city, be more business friendly; More sales type businesses to create more sales tax revenue to the city</p> <p>A better economy will enable to increase law enforcement services making us safer.</p>

The big contributors to the city's economy in my vision are community events that enable small businesses and vendors to benefit from pedestrian traffic whilst creating spaces for Artists and Performing Musicians and additional vendors to create a culture that enables money to flow regularly. Our city focus on agriculture and climate appropriate landscaping should create vibrant public spaces that allow for these community events to thrive

More priority bike paths or combination of bike and SBX paths.

incorporating art into crosswalks

Businesses receive tax incentives if employees live within the city limits. More tax incentives if employees use public transit or walk/bike to work.

More sales-type businesses to create more sales tax revenue to the city

development that builds on pedestrian walkability

yes, tech jobs, Green Jobs, love!

A big change in our policy and procedures with city to allow more business to build in the city, be more business friendly

The majority of city residents work within the city limits. This means matching jobs with the residents and vice versa. The city has attracted businesses by offering tax incentives in exchange for training and investment.

There is a range of job opportunities across sectors and those job skills are taught in schools not just traditional tracks but vocational schools too. And these schools can contribute to innovations in goods production in creative, green ways

City has deferred short CSUSB Alumni are staying local and foster science innovations that include green tech, financing, and clean transportation income (taxes) in exchange for long term investment.

The city will be welcoming of new ideas and new citizens, and everyone will be respected.

Public Services and Infrastructure

Ward 1

bike lanes and tree lined walking paths line both sides of every river and restored flood control channel that passes through the city,these connect with hiking trails where they interface with the local mountains and hills

"enhanced outdoor spaces including more water features, trees (shrubbed) activities for kids aged 12-16",better community centers w/ greater amenities

parks and rec services should operate like community paid gyms w/ comparable hours and classes and accessibility to programming

parks and recreation improvement,safety outreach

robust park and rec activities for all residents

it has not we largely operate as if climate change doesnt affect outdoor activities

mobile homes,checks/balances,managers do not get free reign on throwing people out b/c the public can voice concerns when it comes to outside private businesses

public services,everything that has to do with housing is translated to the language the tenant speaks

public safety,community policing,youth mentorship programs

expansion of language services,continued support of violence intervention program (VIP)

public services,spanish interpretation in ALL areas of housing ESPECIALLY mobile homes,"mobile home residents can have All legal documents in spanish, etc"

uv protection structures in parks,mental health services,"aging community services for companionship, shopping",child care - early child dev,city wifi public and free,parks with physical art

UBI universal basic income,social workers,child care,psychological service,drug rehab,local parks within neighborhoods,more art/murals/after school programs,expansion of the promise program from valley

we needa variety of social services that address housing issues/needs,"health, food, etc",safe and accessible parks and recreation facilities

green spaces,zero emission vehicles,no more warehouses

ISR implementation,zero emission mobil sources

zero emission infrastructure for every new and existing project

outstanding hospitals,great doctors,parks suitable for family getaways/theme parks,clean air,shade for the areas,more trees,clean vegetation

resource centers,education resources,employment preparedness,themed parks,major water source

	"SBD is able to provide an environment which is attractive to high quality employers as a place where their employees desire to live, not remain due to last resort",residents can find employment which pays well within 30 min commute or less via transit
	SBD provides and maintains its public facilities,infrastructure maintenance funding is able to cover needs proactively,infrastructure integrates planning and design for a 3C rise in temp by 2050,SBD only approves development that would not further maintenance backlog
	"food, fun, and fabulous meeting all age groups",restaurants,entertainment,parks,safety,cleanliness
	"technical trade, higher ed job opportunities",team up w/ universities
	translation and accessibility technological hybrid models,better community centers and gardens,compost program,agricultural diversity,affordable housing pipelines
Ward 2	multi-use parks,solar panels,and smart tech for less energy use
	We need safe areas for our citizens
	more police officers
	City Hall,waster re-use/recycle treatment centers,natural hot springs for a spa,More greenery
	Plasma Reactor,Hydrogen Reactor
	I would like it to be a safe city that has safe recreational parks; CBAs
	Mental healthcare instead of police
	Cleaner sewers
	Clean sewers
	Regulate dumping laws; CBAs
	Careers
	Mental health; health clinics; testing
	Better maintained playgrounds; movies in the park; CBA
	Youth summer internships
	CBA; We also want better medical services, clinics that attend to the low income population
	Various parks for everyone's interests
	Upkept streets that don't damage your cars; sidewalks
	Dog parks
	Mobile clinics
	Clinics with services within the city
	Translation in Spanish for all housing; translation in all documents and public spaces
	More summer camps for free for kids; more skateparks
	Services for undocumented community; more visibility
	City should provide its own jobs in development and housing creation
	Youth/parent programs
	do not dump waste near neighborhoods (Oxbow project)
	Music in the park with local bands; local youth parks and rec jobs
	Health programs
	Parks with exercise equipment
	Parks with pools
	More hospitals; Mobile clinics
	Loan programs for businesses; CBA
	More safe parks
	More low-income clinics; CBA
	We want better employment opportunities; we want the community to be taken into account, do not disparage us, we came to work
	Parks and lighting for pedestrians
	Medical clinics; hospitals; CBA
	Clinics with better consultation prices
Ward 3	more walking/biking paths,expand on recreation for youth,more community centers,embrace animal population

	<p>"we have an aging population, so access to (?) facilities and services have adapted to less able individuals"</p> <p>better streets,preserve/restore historic buildings,more community centers,more arts/culture</p> <p>green opportunities,health centers (ex loma linda drayson center),more trees</p> <p>solar,"parks are green, thriving, safe, more trees"</p> <p>more lighting in communities,revitalized parks,housing/businesses using solar panels,more side walks (reconstruct or create new ones)</p> <p>mental health and recovery centers for homeless,water and recreational parks</p> <p>more community centers throughout the city,each center offers a variety of different services based on the communities needs,more well kept outdoor spaces such as trails</p> <p>senior services,green belts and parks that connect,more greening</p>
Ward 4	<p>upgraded infrastructure and city services</p> <p>battery back up or newer technology provide power even when the wind blows</p> <p>LED lighting</p> <p>airport has expanded passenger services,bringing tourists to town,travel and tourism has increased due to safe,walkable streets and a viable arts community/events</p> <p>properly maintain streets,sidewalks,and street lighting,infrastructure kept clean,public services delivered in a user friendly,competent,efficient manner</p> <p>aging infrastructure need to be replaced,SCE need to invest and stop patchwork repairs and too many power outages,better internet access and speeds,more green space on east end</p> <p>streets are newly paved and smooth</p> <p>safe parks for families,safe and clean roadways and sidewalks,free open Wi-Fi,tree lined streets</p> <p>community centers built at each park in the city</p> <p>parks and rec,encourage artists to live in the city</p> <p>parks are green,shady,and well maintained. Patrolled regularly and are crime free</p> <p>new industry focus on presentation,conservation,less pollution</p> <p>economy is diverse and thriving,retail,health and social services,recreational,benefit residents w/good revenue stream for upkeep and public safety,manufacturing</p> <p>increased social services addressing different needs,e.g.,housing,food,healthcare,parks and recreation areas will include more family oriented resources,e.g. playgrounds,picnic areas,etc.</p> <p>medical services: urgent care,clinics,update roads,lighting,sound walls on freeways,aesthetics: add art and plants to community areas to beautify the city</p> <p>public services and infrastructure,services needed: services in small groups,easy access to city hall services</p> <p>we need strong academic schools,activities and events in parks to bring residents together</p> <p>internet company choices,mature parks w/equipment for children that is well maintained and clean as well as tables and covered areas,clean,green,more trees</p> <p>water safety,diversity of landscaping,health care,clean air</p> <p>well-maintained parks</p>
Ward 5	<p>Adult and Children programs</p> <p>Smaller buses but more routes; maintained parks and open space; having centers more in the wards vs just downtown; maintained utilities and street infrastructure</p> <p>Turn vacant warehouses into low-cost, safe entertainment places</p> <p>Parks and recreation: I see a huge waterslide an Secommbe lake</p> <p>After school stuff for kids</p> <p>Lots of green parks; lots of shops and open spaces</p> <p>Bike parks; art parks; botanical gardens; larger parks with more activities</p> <p>Improved, best schools in area!; caring leadership (no corruption)</p> <p>Code enforcement policing</p> <p>Needed public services</p>

	Healthcare
	Lakes; more green spaces
	Green spaces (hiking, trails, garden, arboretums); spaces for outdoor education; safe biking paths/lanes
	Maintain rural/green spaces and use more native agriculture/forestry; smooth, efficient process for folks to have access to public services
	Creating more recreation and community centers
	Let private persons to run services
	Water is less hard due to improved water treatment
	Underground electric lines (to avoid fires); recycling water plant; rain capture systems; permeable surfaces
	Faster police response; commercial international airport
	Tax; bonds; more police and fire response
	Strong communication between government officials and the public
	Greater use of indirect and/or direct potable reuse of our wastewater so that our area is self-sufficient with our water needs
	Recycled/recirculated/reused water and natural resources
	Green belts; protected nature areas (Little Mountain, Perris Hill)
	City has sufficient revenues and practices that have operationalized the continuous maintenance of our infrastructure
	Pristine parks and some of the funds from diversified funds from development; CBAs
	Community benefits agreements; homeless prevention; landlord accountability; parks and recreation; agriculture, compost, gardening; art events
	Larger police department; more effective police and government
	Placemaking models for our open spaces; facilities are designed as one stop shops and offer different amenities
	Improved water quality
	Elevated trains (i.e., Chicago's "L" system)
	City to provide improved infrastructure and well maintained utilities
	More efficient utilities; No Edison power shut offs
	Infrastructure first before houses
Ward 6	Public servants with integrity; services for minorities and people with disabilities
	"one-stop" models; multi-use facilities
	Keep parks well maintained/clean for our families
	CBA: community benefits agreements
	Exercise parks as green spaces and tourist attraction
	More nice affordable housing for seniors; more solar energy
	CBA informed and community focused; public lighting, bike, drought tolerant gardens, edible garden land use, community composting, rental assistance, universal basic income (UBI); CBAs
	Services that include infant to senior citizens: tutoring, lunch program, recreation
	More senior citizen opportunities; work, entertainment; education
	Multi-use park and community centers; less liquor stores; attract health-focused small businesses; emergency preparedness groups and training opportunities
	Free medical; free 2-year colleges; media centers; exercise parks
	OPEN SPACE. For years I have heard my friends say they wish there was a place that everyone can dress nice, play music, and meet at during the weekend. Like a club for ages 16-18. Everyone's parents will know where they are, we can stay until 12, and have fun. Sell drinks and food for funding. Called "The Den" on weekends it will be a club/party place and on the weekdays, a study place. If my idea goes through are you able to contact me for more input (909) 913-0831/(323) 424-8715
	Desperate need for mental health services, homeless services, improved senior citizen and veteran services, housing support services
	Job skill development, parks and rec, sports equipment=free gym
	Robust CIP

	<p>Adequate public safety; place for the arts; auto/EV charging stations</p> <p>A new city council; stop changing whatever the community does tonight!</p> <p>Parks and Recreation: clean up, repairing lights, playgrounds; green services with charging stations; infrastructure for: public works, public mental health worker to help neighbors</p> <p>Maintained parks, more reusable energy (i.e., solar), more senior services, housing for all income levels</p> <p>Parks and recreation services are needed to fulfill needs of all family members; stop shop all activities for parents, scholars, and senior citizens</p> <p>Customer service improvement: sector-divide the city- all needs are met within</p> <p>An updated hospital; a dog park</p> <p>Renovate our facilities with green infrastructure; conservation; transportation routes reflect efficient planning</p>
Ward 7	<p>Sports for youth, after school programs; job training</p> <p>Mental health is more accessible; free class on weekends for everyone to do yoga/martial arts/any exercise that normally you pay for</p> <p>Free health screenings</p> <p>Health services</p> <p>Entire city needs renovating</p> <p>Large, safe and maintained green spaces within view on every block; public services should be available online at all hours-no need to visit city hall; fast, effective public transportation</p> <p>Medical services; legal; parks and rec; education; programs for kids; taking care of seniors</p> <p>Services: health oriented activities focus on physical movement</p> <p>Accessible healthcare-mental and physical-more accessible, make long term</p> <p>Small clinics (human and animal) everywhere</p> <p>Casino contributes to city economy</p> <p>Parks, trails (walking); entertainment activity; restaurants, transportation, medical grocery stores, retail</p> <p>Monthly night out events in our parks; professional July 4th events; perhaps a county fair and weekly market nights in our open spaces</p> <p>San Bernardino is able to provide quality civic infrastructure; San Bernardino is able to provide all residents a quality park within a 10 minute walk of their home</p> <p>Senior programs and youth programs; build free programs built into parks and recreation</p> <p>Parks and recreation are an important part of daily lives-recreational activities for youth and seniors have grown and supported</p> <p>Health and elderly community centers</p> <p>Health aesthetics to public parks (lifting and cardio equipment)</p> <p>Charging stations for electric vehicles; water conservation; parks and amenities</p> <p>Healthcare; training programs for jobs; clean parks and community activities for all ages</p> <p>Education; job opportunities</p> <p>Better animal shelter/rescue; historical restoration and preservation; after school programs; mental health</p> <p>More walking paths; revitalize and fun parks and rec</p> <p>Medical services; parks and rec; education; increased program for kids; increase programs for seniors</p> <p>Parks and recreation for people, but safe and open to pets</p> <p>Productive engagement not lip service; parks-the heart of a community (i.e., prospect park in Redlands many different parks) something for everyone</p> <p>A more diverse, cultural, and ethnically competent law enforcement</p> <p>Excellent enforcement services for the things that matter to our city's wellbeing; well maintained and monitored</p>
Citywide (Virtual)	<p>Ceramics, open mic, sports classes</p> <p>More after school options for kids -Arts, learning, trades etc. places to gather and hang out with each other outside of school, places to eat and buy good food</p> <p>Safety needs: all residents need to feel safe on the streets at all times of day and night</p> <p>Physiological: access to healthy foods, clean water, clean air, green spaces</p> <p>gardens, food forests, green infrastructure with multiple uses</p>

Community gardens, events, resource centers, more green spaces
 Better energy infrastructure, green energy generation to add to our grid, Agriculture and Landscaping and community gardens in public land and community composting programs keeping our folks fed and learning to work with our natural resources vs. against them
 better internet infrastructure and resources distributed EQUITABLY across the city
 You only need to look to Rancho Cucamonga for the future needs.
 We need more green spaces and parks to gather, more community-led events.
 We need to look at AARP's Livable Cities, for all ages.
 walking trails, bright solar lights at parks and yes, great idea with gardens
 Community murals and painted crosswalks and bike paths

Environment and Climate

Ward 1

expand reclaimed water lines
 secomb lake is clear,all land is watered and clean
 water conservation,water resistant plants and infrastructure
 the city has aggressively promoted ev charging stations,safe street designs for cyclists and pedestrians,mixed use development that creates walkable neighborhoods clustered around mass transit stops
 source of water aquifers
 add more parks,green spaces,planting more trees,more green space,community gardens and community centers 4 kids
 forest preservation reducing fire danger in mtn areas,made green energy more accessible
 more trees planted,affordable prices clean energy,update old homes and buildings with windows and installation,better programs for community,keep waterways clean,forest lakes free of pollution
 "for every warehouse approved, the same amount of space will be allocated w/ green space meaning trees, gardens, etc"
 SBD has greatly improved the viability of non-car transportation,SBD concentrates development within existing infrastructure to minimize impacts on natural lands,SBD is able to leverage funds to be location of 30x30 state (?) conservation goals
 electric cars
 creating micro-grids for sustainable energy
 ban all single use plastics,no more fossil fuel dependency
 (covered by other note) in open spaces,plant more trees for oxygen production,air scrubbers in spaces with lots of people,composting instead of landfill,use methane from landfills
 green (covered by note),make use of santa ana winds for turbines
 SBD is able to reduce transportation GHG emissions by 60%,SBD offers some of the lowest per capita emissions within the SCAG region,SBD is a carbon sink
 green house emission reduction plan enforcement
 less diesel vehicles,better lighting in facilities,increase solar powered buildings,encourage sustainable practices with corporate partners
 we have become more environmentally conscious when considering development,restricting uses of certain transport vehicles and activity,preservation of downtown aquifers and foothill areas of the mountains
 (covered by note) walkability,promoted solar energy,embellished (?)
 prioritize health and safety,organize food access,community gardens
 create strict environmental justice element!
 adapt our agriculture to native sustainable plants and incentivize families to grow food on parkways,even incentive programs
 hydrogen car filling stations,incentives to use non plastics,publc areas use gray water to outdoor water feature,better use of water runoff,underground elec. lines to help wildfires,water filling stations to reduce plastic
 "remove amazon or have them pay for the pollution that their trucks, planes, etc, produce",less warehouses/big businesses need to sign robust community benefits agreements and these are legally binding pledging to reduce carbon imprint

government services are provided comprehensively in multiple languages,"government is transparent, accountable, and based on the concept of servant-leadership"
partner with organizations for appliance and solar rebates

a highly developed public transportation system would greatly help to address the critical issue of climate change,"increased number of greenspaces/parks throughout the city would help as well (more trees, etc)"

Ward 2

We've implemented the appropriate laws and local ordinance,we've become a "smart" city

We need to educate all citizens about the impact of various changes with will happen with climate change

We've invested in the right partnerships and companies to implement clean and sustainable technology

Plant more trees,green areas

Rivers need water-freeways need train systems

Use more electric cars and commuter access like subways

Create walkable alleys with greenbelt,plant more trees,green spaces in high density neighborhoods,geothermal waters-find ways to keep them warm and re-use

City food composting program

All schools have gardens

Management of natural resources by indigenous stewards

All electrical poles taken off; electricity runs under

Getting zero emissions; no warehouses (too much pollution)

Community gardens; community composting

No huge trucks in neighborhoods; less warehouses

Addressed and solved the drought in our area

More gardens; more electric affordable cars; solar housing

CBA/DDA/Non utilization tax; agricultural use of vacant and absentee landlord land stock; Native plants and agricultural economy

Charge companies that pollute/contaminate; CBA

Gardening and composting

Car free zones (repurposing of roads)

Recycling programs

Big chain companies/stores pay taxes to the city

Tax polluting industries (cough, cough amazon); electrification of trucks and trains

CBA; filters in schools to improve the air quality in schools and the city

Green spaces and community gardens

Designated semi routes; set standards for warehouses to mitigate pollution/noise

More hospitals and clinics

More support for the retired population; CBA

Move companies that pollute

Ward 3

greater fire retardant materials for housing in foothills,solar panels are (?)

zero emission transportation,"lake, water, natural springs"

all new development is built with solar panels,more green pockets in both residential and commercial areas,community gardens in each ward

alternative fuels,biodiesel,alcohol,urban forest

invest in rehabing secombe lake,as city grows the water plant needs to grow with it to provide safe/clean water,more alternative fuel vehicles

"mountains, forest and rivers preserved for natural resource and recreational use"

restricted truck routes,less warehouses that cause indirect pollution,more trees/green spaces,more electric vehicles

conservation and preserving national forests - more firefighters,more trees

water

smog control and pest control,water control,installing solar lighting

Ward 4	solar panels top roofs of all large buildings
	putting California on the high road a job's climate plan,California workforce development south coast AQMD,all have found a local skilled and trained workforce can mitigate pollution and climate challenges
	city should require local skilled and trained on projects
	need to plant more trees,conserve water
	valuing the history of the city and the ethnicity of its residents
	add shade trees as needed,incentives for native plant landscaping,fewer lawns to conserve water,preserve the foothill areas,control excess population
	urban forestry,recycle water,preserve arrowhead
	public transportation will be crucial in this area,SB is blessed with extraordinary resources-conservation will be key
	maintain a camper free clean environment,enforcement,environmental laws
	cleaner air,regulation and resources in place to maximize clean air,etc.,conservation,water
	flooding and wildfires-need proper vegetation management in forests/foothills to reduce spread into neighborhoods
	rainwater capture for public park irrigation use
	implement green technologies on commercial buildings
	Environmental climate: reduce automobile traffic-need better flexible transportation,plant trees
	electrical vehicles have reduced GHG,solar roofs have become common
	Incentives and reasonably accessible/cost for low water landscaping
	we have developed policies that makes warehouse businesses to reduce emissions from their trucks
	more shade trees (not palm trees),install solar panels in all large parking lots,more low water landscaping,require new homes to be very energy efficient in design and landscaping
	keep SBMWD intact,no homeless trashing our spaces
	funding of police continue to increase
Ward 5	Politics and money being
	More electric cars and heavy machinery
	Emission free; solar; more green spaces; safety; water resources=lake
	Plant based auto fuel-everything should not be electric; solar wind farms; less warehousing
	Invest in green living/communities
	Beautification of the city's common areas
	Improve conservation and natural resources
	Utilizing renewable energy; mostly electric vehicles
	Low carbon city forests
	No more dumping, using our city as a trash can for other communities
	Less warehouses, less amazon; funds to turn grass areas in homes into natural habitats; green space
	Green/eco transportation; remove nestle; remove industrial development; protect native plants and wildlife
	Increase tree canopy with shady native vegetation (no palm trees); recycle water (orange county does it); solar on all housing; electric vehicle infrastructure; no more truck traffic
	Stricter regulations of industrial facilities (their emissions); limitation of new warehouses; composting services
	Solar, wind, electric power, expand the electric grid; green energy
	Hire Al Gore
	Solar cell subsidy insulation upgrades
	Electrification of SBX
	Water resources; emission free vehicles
	Maintain open space; no hillside development; able to keep/store rain water; planted lots of trees
Remove fire prone trees; promote xeriscaping; water permeable sidewalks; smart tree planting in downtown	

	<p>Ask for taxation from all companies with large footprints on our roads and air</p> <p>Healthful renewable resources</p> <p>Mandating electric vehicle; saving water by limitations of use</p> <p>Renewable energy capital of California</p> <p>We have green infrastructure; more electric scooters; we have a diverse set of energy sources</p> <p>Electric vehicles; plant more trees; minimize traffic use day and night</p> <p>No more front yard grass; electrification of trucks/cars</p> <p>Open space preservation and creation is built into general plan and policies</p> <p>Improved air quality; improved water quality; more trees along development; less fire hazard</p>
Ward 6	<p>Finding ways to cut down smog and pollution; fires not being such a threat; buildings being able to withstand natural disasters</p> <p>Climate change is real; people need clean air, decreased emissions, and healthier quality of living. Without addressing these issues, we will suffocate to death.</p> <p>Turn Rt 66 into a solar plant</p> <p>Implementation; Hire a “master planner”</p> <p>We have a sustainability plan, but it has not been shared to general population</p> <p>Gas replaced by plant based fuel; more renewable (i.e., solar and wind)’; stronger recycling programs; maintained parks and open space</p> <p>Growing more trees that are low water, using more solar and wind</p> <p>Parks have been revitalized and there are more parks in places</p> <p>Social determinants will have been resolved; black infant health issues in the community as well as other diabetes, high blood pressure, etc.</p> <p>To reduce greenhouse gases; all cars are electric; recyclable energy through converting food waste to energy and reducing power grid</p> <p>Create a better train system utilize different fuel types for transportation; plant more trees for oxygenation; find a way to capture natural water for recycling</p> <p>We need to think environment first; if we don’t take care of our environment and fit it into our daily living (everything: transportation, housing, economy, health) in 20-30 years our future is bleak</p> <p>Winds-smog= health issues</p> <p>We have decreased the trucks and trains and detrimental impacts most affecting our climate erosion. We will have developed a formal approach for permanent education</p> <p>CBA; job creation to address issues; EV incentives and conversions for diesel/public transportation/ trains; removal of invasive species and introduction of native agriculture and sustainable drought, rooting, and food production’</p> <p>Lower vehicles emissions; electric vehicles; larger tree shade; Lytle creek hiking needs better preservation; water conservation gardens; teaching youth about climate change</p> <p>CBA Agreements; little mountain; green infrastructure; drought resistant landscaping</p> <p>Clean air; electric vehicle charging stations; enhanced availability of mountain environment</p>
Ward 7	<p>More trees and plants in parks for air quality</p> <p>We have bought out more lots to plant trees and gardens to help with their quality; rooftop gardens; more accessible public transportation to not have to drive everywhere</p> <p>Stricter rules/sanctions for warehouses; more trees; more recycling incentives; less semi-truck traffic; cleaner parks, national forest, etc.</p> <p>Solar on every roof; invested in geothermal energy; no private lawns; concrete replaced with livable materials that capture rainwater and promote landscape</p> <p>Smog filters around city/airport; green technology-cars, buses, trucks, planes; bring in windmills to produce electricity</p> <p>Composting offered not just green waste bin; net zero warehouses; net zero trucks; reduce last mile greenhouse gases; innovative water and waste technology</p> <p>Recycle and reuse water to support undivided as on individual lots</p> <p>Continue usage of clean air vehicles; offer fuel alternative (i.e., E-85/Hydrogen)</p> <p>Expand roundabouts as a solution to reduce carbon emissions and enhance public safety; San Bernardino national forests have been greatly expanded and reforested which have improved air quality and reduced carbon emissions</p>

	<p>Not enough attention by our leaders to climate changed</p> <p>Clear paths in wooded areas; increase in equipment for fire abatement</p> <p>We're carbon neutral</p> <p>Hopefully the arrowhead springs hotel will be utilized</p> <p>San Bernardino has allowed too many warehouses into the city which in turn brings more diesel trucks which in turn creates more smog</p> <p>Need individual water meters at all multifamily so people encourage to conserve water; solar panels that last longer than 20 years are not expensive to replace and maintain</p> <p>Maintain trails</p> <p>We have stopped cutting down all the trees and replacing them with concrete buildings; use more natural sources for power (wind and sun)</p> <p>The entirety of our public transportation has gone electric, reducing greenhouse gases and providing residents with reliable and affordable transportation options</p> <p>San Bernardino is prepared for a rise of 3 degrees Celsius by 2050. San Bernardino is able to preserve open space in the north part of the city</p> <p>Make electric cars available for all individuals regardless of income status</p> <p>Too many fast foods-need more healthy restaurants and healthy food stores</p> <p>No strategic fire management; this is an area that could define us. Breweries that recycle waste into energy; must attract educated people interested in working</p>
Citywide (Virtual)	<p>We need to look at AARP's Livable Cities, for all ages.</p> <p>Land use ordinances to allow public land and parkways be used to grow vegetables, trees, and flowers.</p> <p>Pedestrian friendly walking paths, dessert plant gardens, bike infrastructure</p> <p>all activities needed to run a city are environmentally friendly</p> <p>We need to protect our water and not sell it so cheaply to other agencies. We need to develop the river we have.</p> <p>fireproof houses, that can handle heat. limited development in fire and flood prone areas. sage scrub and riparian areas protected and expanded and accessible</p> <p>Growth is restrained to availability of water. No water = no growth.</p> <p>utilize the vacant lots to plant native plants and trees and gives these spaces to the community to steward</p> <p>We understand the importance of identifying the science behind carbon sequestration. Our nearby deserts account for 10% of carbon sequestration in the state of California....so we need to protect the desert from illegal marijuana grows and ensure solar is placed on rooftops and close to the consumers instead of in the desert, if so, place them in the desert where they will do least amount of harm.</p> <p>Charging stations?</p> <p>Built large spaces of "green" spaces in exchange for individual yards. Not hundreds of small spaces, but green spaces that span the city.</p> <p>Yes, solar on roof tops</p>
Health and Safety	
Ward 1	<p>urban connectivity,our (?) and equitable city,promote affordable housing,high density and mixed housing development</p> <p>benchmark,SBPD involvement,safety,support of health and human (?),broad recruitment,community engagement</p> <p>updated infrastructure,update building codes</p> <p>the city strongly incentivizes the distribution of healthy foods at new grocery stores,the city aggressively combats air pollution by promoting better industrial transport technology development</p> <p>small neighborhood grocery shops where people can walk to,walking paths throughout city,bike paths to DTW and work places,community health fairs in the neighborhood,free screenings</p> <p>the citys two top priorities for new construction are seismic resilience and fire resistance</p> <p>strong code enforcement division</p> <p>getting rid of invasive fire prone plants and bring back native plants with controlled burning,adobe (?) for housing stock</p>

air quality,less pollution in SB,less emissions because warehouses have been given a set # of warehouses in SB

warehouse moratorium,only 10 or less warehouses in sb,all contribute \$ to fighting the pollution as a mandate to be here

have a rapid response natural disaster plan!,train community

universal basic income,state/federal universal healthcare,more walkways/ playgrounds,people make enough money to prepare for emergencies instead of living paycheck to paycheck and only thinking in the immediate

SBD has reduced the asthma rate among children,sbd has eliminated traffic deaths and serious injuries,sbd has moved into top 10% of healthy places index,sbd requires health risk assessment and mitigation for industrial projects

"we have properly prepared for emergencies with infrastructure improvements such as additional easment and exits, trails that serve as evacuation routes"

top notch doctors,great hospitals,better outreach,drugs/alcohol programs,update infrastructure,keep drains free of debris,removal of dead vegetation,sbd is prepared for natural disasters such as earthquakes which arent related to climate change

install fire suppression on vulnerable hillsides near homes,rebates on fire supp. by private owners,no dead palm fronds hanging on trees

health education in park and rec partner with school district

walkability -> healthy commerce

access to healthy/organic foods,access to healthcare,healthy living/prevention workshops

health fairs for undocumented communities!,education fairs

"healthy lifestyle gym, hiking, sports",more healthy food options,health care

contributors/determinants of a healthy community,reduced pollution by developing public transportation,reassessing industrial areas and addressing problems via technology,health education in schools/ communities,access to health care for as many residents as possible

access to organic healthy foods and housing affordability,funding crime prevention and intervention vs police

promote healthy lifestyles,healthy food choices,farmers markets,agriculture,providing quality affordable healthcare and promote exercise w gym and fitness club memberships,less fast food

greater walkability,promoted education on (?)

Ward 2

Balance industrial spaces with greenbelts/trees,neighborhoods (neighbor-to-neighbor comradery),more trees (drought tolerant trees)

Replant trees in burn areas and keep the dead brush cleared out

Stop use of polymers plastic in our food and water

make more buildings structures safe to quakes

Clean up the dry brush on hills and mountains

we've successfully implemented public health campaigns,we've prepared early for natural disasters and created supportive and connected communities

Health insurance for all regardless of their immigration status

Alternative to police

Access to organic meats and veggies

Reassess police funding; community alternative to policing for violence intervention/prevention programs

Health events

Better school meals OR parents required to have a class in obesity control

Better air quality because it's very contaminated. Factories/warehouses need to take precaution

Youth and adult activities; CBA

More outreach to inform of natural hazards

Use measure S fund (\$1M) to fund SB VIP

We don't need overpaid police positions

More police

	<p>Fumigations in fruit fields; CBA</p> <p>Retrofit local homes for earthquakes</p> <p>Bike lanes</p> <p>Public exercise opportunities (bike lanes, outdoor gyms, skate parks)</p> <p>Sewage cleanup; CBA</p> <p>Maintain and clean areas with dry vegetation</p> <p>Designate waste dumping areas; use toilet water to keep nature green/moist</p> <p>Legalize prostitution (designated areas)</p> <p>More healthy food options</p> <p>Mental health crisis center, low cost</p> <p>Better school meals</p>
Ward 3	<p>creating emergency plan,natural disaster centers</p> <p>how do we adapt to climate change?,need to create less pollution,need a response team and or protocol in case of emergency</p> <p>"strong emergency services taskforce prepared to address natural disaster, mutual aid established"</p> <p>active emergency plans for each ward,high fire zones are monitored and maintained annually by city and county,schools have more filtered classrooms,outdoor learning areas</p> <p>educate populace on importance of fire safety around their property,"promote walking, biking",look at loma linda for examples how to promote this</p> <p>housing has been (?) to high ground shaking from earth quakes</p> <p>climate change: we've adopted efficient heat exchangers for homes and work</p> <p>educating the community,continual checks on improving buildings/homes,higher standards for all urban forest</p> <p>"housing built to withstand severe damage to earthquake, fire, and flooding"</p> <p>every resident/businesses are prepared for natural disaster,all homes are retrofitted to withstand earthquakes</p>
Ward 4	<p>areas for stress relief and exercise: walking,outdoor yoga,cycling,increase fire dept budget,reservoirs of water,update buildings for earthquakes,first aid/cpr training-required and free</p> <p>don't focus on growth at the expense of health-don't just keep building-fix and maintain what is already here,get the homeless off the street and into facilities that actually help them</p> <p>promote outdoor activities,urban forest</p> <p>increase public health services and education to the underserved,education on wildfire prevention starting in public schools</p> <p>understanding that more warehouses means more trucks and bad air for kids. NO MORE warehouses.</p> <p>residents need to be educated with respect to health and preventative measures and should have equal access to healthcare,resources conservation can play a part and prevent wildfires and other natural disasters</p> <p>need to exercise kids about exercise and nutrition,be prepared for earthquakes,wildfires,etc.</p> <p>implement fire resistive and flood resistive construction materials in buildings</p> <p>emphasize good nutrition,get rid of guns! The police are the only ones who need guns!</p> <p>home built with better fire proofing,100% energy efficient</p> <p>water conscious,landscaping in public/street areas</p> <p>three schools & university-emphasize preparations for natural hazards</p>
Ward 5	<p>Maintained parks; reusable fuels; better zoning for industrial and commercial</p> <p>Separate industrial/residential areas; fire breaks built into neighborhood; fire resistant housing</p> <p>Community programs to teach citizens how to be aware of particular dangers based on demographics</p> <p>Transportation infrastructure in place to properly evacuate all neighborhoods should a natural disaster, such as an earthquake or wildfire exist</p> <p>Universal healthcare; health priority over profits from money (\$\$\$)</p> <p>Stop toxic builders who care for only thing "money (\$)"</p>

Funds found to pay to have more police or security; grow more gardens and more self-sustaining fire

Preserved Shandin Hills golf course and arrowhead

More open space

More green open space

Low water use plants

People walking everywhere because city is well lit; more exits/evacuation routes and notifications of all emergencies

Will have more technology to fight fires, better fire trucks, and robots

Placement of building in city stupid stuff like OXB

Warehouses much be in logistic corridors, away from residential and schools

Health education; healthy food restaurant choices

Access to whole foods (grocery stores, farmers markets); high quality open space and recreation facilities; protect sensitive land use from pollution sources; cooling centers

Fund youth activities, and provide waivers for low income families; provide safe spaces for unhoused residents; community oversight on police; no more industrial development; community benefits agreement

Build catch basin to recoup run-off water, fight fires; build a lake

Eliminated food deserts; reduced proliferation of fast food restaurants; prohibited proliferation of liquor stores; take away cell phones until 18 years old; require physical activity in school

Less liquor stores; more food; diverse stores; mental health and drug related rehabilitation that doesn't criminalize

Organic food products; emergency plan for natural disasters; prepared for earthquakes/fire

Invest in healthier food options (farmers market); more trails

Affordable healthcare; community clinics; shops at walking distance; see the community walking everywhere

No more drive-thrus!

Medicare for all; community health workers; needle exchanges/harm reduction programs; farmers market (urban/local farming); adequate translator services

More mental health facilities; more nutritional knowledge and businesses

Ward 6

A well-funded violence intervention program; stop hiring police! Hire social workers; all Black and Latino leadership in SBPD starting with the chief of police; stop overspending our budget on police

Lots of trees; kept our own water

Less: fast food restaurants, drugs at a young age; more city art for the mental

Become an AARP city

No outside activities; need more CERT training; start city activities free; have kids make games and compete with them; revitalize empty building for usable spaces

Address the health and welfare of individuals by funding to adjust for changes

More after school recreation programs; mountain parks and green space; provide healthy food to all neighborhoods

Lack of healthy fresh foods and vegetables within communities; children becoming more sedative

CBA's to create the jobs necessary to prepare the city to evolve sustainable native plants, agriculture access, and water; adobe earth dome/sky housing and architecture to combat earthquakes and fires (CBAs)

There should be more stores or farmers markets with healthy food choices

Fireworks, gangs, crime, law enforcement needs to be educated in special needs situations

Affordable mental health care; affordable education

Create exercise parks along Rt 66 as a tourist attraction and for community activities

Black police chief to reflect the makeup of your city

Bike lanes/safety light etc.; community gardens; free clinics government promotes

Less police; fully funded alternatives; violence intervention program; cahoots; mental health service

Mental health; sustainable goods; community gardens; desert gardens; farmers markets; food/environmental education

	There are programs that help address the dead/dry vegetation to help avoid fire hazards	
Ward 7	Lots of trees and increase of green improvements; more walkable routes to activities	
	Community gardens	
	Made our buildings more resilient to earthquakes; more outdoor activities to help us get healthy; community gardens are accessible and not super costly to participate in; free hike groups	
	More neighborhood clinics and access to telemedicine	
	Waste management control; know and stop on top of cutting edge preparations for natural disasters	
	More healthy eateries	
	Spiritual health; more church activities for youth; give them a moral compass	
	Made infrastructure and business that are made to being more green; weatherproof infrastructure	
	Walkable parks	
	Provide necessary resources; proper resources and training	
	Community spaces; encourage walking and outdoor activities; locally grown fruits and vegetables and access to community gardens; no construction in hazard zones (turn into green space)	
	Increase healthier food options; encourage health and wellness through activities; family fun; increase certified training to community by ward	
	Educate all youth and families	
	Lots of education	
	Expanded off affordable healthcare to everyone regardless of their status; more responsible development in regard to our warehouses and their proximity to our homes, schools, and community centers	
	Focus on gardens edible, less fast food; more community involvement in gardens and parks	
	Clean air, safe routes to school, bike paths, etc.	
	Drivers respect traffic regulation; all have affordable health insurance	
	Incentives for physical fitness amongst workplaces, schools, and churches; increase awareness in schools and communities	
	Better food from out own community garden	
	Access to clean, safe, beautiful parks/nature reserves for all	
	More A/C units affordable energy (solar?) to keep cool during heatwaves; No deaths from heat	
	More water treatment facilities	
	Citywide (Virtual)	Non utilization taxes & Land Use ordinances to allow community members to grow edible gardens and steward land when developers sit on it after a certain amount of time.
We have stopped dividing the city into commercial OR residential areas.		
As development space becomes sparse, we don't allow developers to continue to press into questionable areas, such as flood plains or known faults.		
Develop and adapt to density rather than sprawl - maximize urban efficiency		
Energy and energy distribution will be key for health, safety and mitigating climate change.		
We've created community in our neighborhoods, and we are self-resilient. We are healthy because we have been able to keep warehouses and corporations accountable for polluting our environment and we are healthy bcc we have access to gorgeous public lands that assist with our mental and physical health. Adobe Earth Dome Housing Architecture & alternative housing that is more suited to dealing with wind, fire, and earthquakes.		
We do need to prepare for all disasters. We need better building codes. Be self reliant for emergencies, ie have our own water source, food and cots for shelters . In ohterwords, lets not rely on the Red Cross for recovery		
Building codes need to be compatible		
bike trails, linear parks solar charging that provides shade for plants and people. parks that provide food, shade, habitat, economic opportunity and soak up storm waters		
We need to help people with lifestyle changes. Blue Zones.		
++++Adobe Earth Domes! Yes.		
Fair and Equitable City		

Ward 1

strict truck routes away from residential and sensitive receptor sites

develop a strict and enforceable environmental justice element

prioritize green spaces and conservation, ordinance to make political contributions a conflict of interest

follow sb1000 and sb330!

homelessness and income: housing cost ratios

access to community shared resources unity

increase affordable housing stock, stop letting industry screw over our people, mandates and fines

benchmarks that make sb a fair and equitable community, "the level of access to public services, housing, food etc for all residents regardless of socioeconomic status or immigration", the degree to which residents feel they have a voice in what happens to sb

equitable access to housing especially low income and low low income

language accessibility to all city resources

community involvement in future and present projects

let community lead!, access for community to be involved in city planning and development

sbd prioritizes policies that remediate polluted sites, sbd is within the bottom 50 scores on calenviroscreen, sbd develops housing in a mixed income/integrated manner around the city, sbd residents have access to tools to address equity issues

every city dept. has a public statement of its commitment to respecting humanity of all types, "parity (racial, gender) in business ownership for neighborhoods", art and architecture that honors the diverse communities

no more warehouses, no housing near polluters/freeways

community education about environmental justice

"the city has largely abandoned single use zoning, allowing new residential construction in all areas to become more affordable for more people"

"we've accomplished responsible development, ensuring we have a range of housing (med-low density)", we've created grants that allow for home ownership and decreased the rate of rentership

resource accessibility for all residents, diversity, education, not evolved

easy place to start a company, small business friendly, everyone has an equal opportunity, good honest programs for families

implementation of a universal basic income regardless of immigration status, equitable taxation of big businesses like amazon, accessible housing higher level than mandated throughout city, robust cbs

community benefits agreement

everything that has to do with legal paperwork and all council meetings are translated to spanish or etc languages

"spanish speaking parents can advocate in all levels of government because they are welcomed and accommodated, language translation is available"

undocumented individuals are heard and accepted, they are joining the dialog without fear

Ward 2

Integrated neighborhoods across the whole city instead of concentrating too much of one thing, equal access, equal zoning/spaces

mix-use, communities plus microbusinesses opportunities funding

many old people homeless can't afford to have a home on SSI

need to make elderly affordable housing

low-income housing but strict enforcement of no gang crime

I don't know

We have implemented laws and ordinances that are equitable and inclusive

we have changed systems internally to address barriers to communities that have been negatively affected

DDA

DDA

Abolishing the police

CBA/DDA/Non-utility tax; reassess police funding; affordable housing; agriculture; tenant unions

Release use of funding of city, reallocate funding to more community benefits

	Remove hazards; electrical underground; remove burned buildings; put green spaces in vacant lots
	No redlining
	Diversity in positions of power
	Free therapy for homeless
	Cultural/entertainment
	Services for homeless population
	Allow undocumented people to vote in local elections
	Tax the corporations to pay for community benefits
	Desegregate neighbors by zero-interest loans; nationalize Wells Fargo
	Mandatory racial bias training for city and school staff
Ward 3	affordable housing throughout the city,more community engagement to hear the residents voices
	poverty has decreased as residents are thriving with resources,good pay jobs and more homeowners
	safe communities with more policing,blight control,less homeless
	affordable housing,better job opportunities,higher standard of homes/businesses,cleaner city
	ensure homes/schools are at least 500+ feet buffer zone from warehouses,more equitable job
	opportunities,more good jobs
	"all residents have clean, safe housing available to them"
	specific plans in place for development and economic growth for all diverse communities,fair distribution
	of taxes to enhance development
Ward 4	adopt a health community initiative and incorporate into municipal code and development design
	education for all: first 2 years of community college or trade school so people can get jobs,the school
	tuition must be affordable. Education is essential.
	by controlling the hazards around lower income neighborhoods,we can create equity.
	can residents get to doctors,within their neighborhood?,etc.
	all residents have attractive,affordable homes available to them,with parks,good schools,safe streets
	there is a basic wage so that everyone has enough money to have a good life
	city services should be distributed fairly and equally throughout the city
	green paces,farmers,markets,fresh vegetables
	balance "social" functions with city economic development strategy
	attract and retain "contributors"
	thriving businesses employ residents of all income levels and lower commutes
	"fair and equitable" will be measured by how effective we have addressed the needs of all our
	communities and populations,no matter their income level,race,ethnicity,ability level,etc.
	planning and economic development be applied to all geo and diverse communities,specific plan develop
	for each community's unique features
	we need good paying jobs available,need more homeowners and fewer absent landlords
Ward 5	Educated public servants; leaders in renewable energy; stronger community
	Equitable distribution of tax dollars
	Community engagement starting in elementary were students are involved and community
	Listen to the Residents
	Community Benefits Agreement (CBA)
	Majority of residents concerns are heard! If people don't want it, it does not happen
	All wards are equal and receive equal resource; More focus on vulnerable, disadvantage areas
	Living wage employment; undocumented citizen support and employment; affordable housing all over;
	more diversity in leadership roles; transparent government
	Community involvement
	Planning is thoughtful to where citywide we strive for excellence, there is no "good part" "bad part"
	Permit parking on public roads is reduced to only overcrowded streets by universities and other congested
	business areas
	Lower building cost which lowers home costs
	Affordable and stable housing options for all near workplaces; reparations for harm done to community;
	ensure community benefits agreements

	<p>Include native people into every topic</p> <p>Equal opportunity to be a part of making things to grow forward</p> <p>Community benefits agreements; require 10-20% community input on development vs. event based; real representation; accountability</p> <p>Accessibility, affordability, opportunity for adequate housing</p> <p>Protective zoning (limitations of warehouses); maintained community engagement with city development; has to be accessible to the vulnerable communities (translators?)</p> <p>Allow and encourage free capitalism; encourage cottage industry; encourage trade and high tech education</p> <p>Stop cash buy for homes used for profit; prioritize marginalized groups (LGBTQ, BIPOC); Create a diverse community oversight on housing building, apartments, complexes, etc.</p>
Ward 6	<p>Invest funds equitably in all wards; CBAs bring local jobs</p> <p>CBA: community benefits agreements in all developments; better media/communication from city</p> <p>Community benefits agreements (CBAs)</p> <p>In 30 years, I will be in my 90s; objective: bring San Bernardino back to life; all agencies work together for the good of the city</p> <p>Stop practicing racism; care about everyone and every community</p> <p>All social groups provided equal quality of services (e.g., education, public safety, public works, housing, health care, civic government; more community benefit agreements engaging local households</p> <p>Free medical; free 2 year college</p> <p>Everyone will benefit by doing needs assessment by finding; supply the needy first</p> <p>Leaders in health and education</p> <p>San Bernardino can have more affordable housing</p> <p>Evidence based outreach to reach our most vulnerable population (promotions, etc.); all sectors of the community will have access to the same services</p> <p>CBAs; RHNA: Housing report card; healthy protective zoning; mixed income housing; affordable 20% housing</p> <p>Police and city staff should live in the city; we don't even have blacks on the team directing the plan</p> <p>A written and decisive contract with the city that details equity and leadership</p> <p>Variable housing in all areas; limit liquor stores and cannabis shops in all areas; encourage entertainment and arts in the city</p> <p>Local business support incubators; jobs with benefits and healthcare; mixed use housing; affordable housing</p> <p>Good streets</p> <p>Stop practicing racism; the first benchmarks are to provide transparency and identify correct measures with community input. Fair and equitable means honesty and willingness to change offensive practices</p>
Ward 7	<p>We invest and prioritize our most disinvested neighborhoods; inclusive engagement opportunities by leveraging technology</p> <p>open representation and total engaged community; resident sensitive planning</p> <p>Increase mixed income neighborhoods away from pollution</p> <p>provide opportunities; educate</p> <p>Rent control; better/affordable apartments in high traffic areas of the city</p> <p>Equity; separation of social groups eliminated</p> <p>Better jobs; lower crime rate; trust in the police</p> <p>Higher and livable paying wages; accessible; allowing for economic development</p> <p>Equal opportunities for everyone; resources within reach for everyone</p> <p>Education is key and each one of us should model what we preach</p> <p>Focus on 40 census tracts and bring them up too</p> <p>The rules apply to all; opportunity is a fair level playing field; Stop finding excuses to fail--everyone experiences hardships</p> <p>Everyone has access to what is available in the city; involve community in city planning; reduce low income housing</p> <p>We should not be focusing on divisive philosophy. We are a mixed race community.</p>

	Fair and equitable means raising the disadvantaged, NOT lowering the successful!; Multipurpose zoning when a variety of homes and businesses are located in a neighborhood
	The City officials must engage and listen to those within the community who are most vulnerable and economically at risk
	Make sure that we all have access to the houses we want at the prices that don't require us moving to the outskirts of the city; the city fines warehouses if they emit more pollution than needed; Recycle!
	community organizers (churches, local clubs, etc.) encourage active mingling of all the classes with not judgement; housing prices have been set at a fair standard and our local wages have been raised; police have direct community involvement
	Integrated income brackets together
	rate of police arrest of people of color mirrors the population
	San Bernardino has no census tracts in the top 25 on CalEnviroScreen; It is recognized as part of top 100 most livable cities worldwide
	Residents are able to easily incorporate healthy means of transportation as part of their mobility portfolio; Pioneers use of passive methods of environmental cooling
	Put more affordable housing all over the city where people of all backgrounds want to live near social networks
	Good laws and rules have been put in place and ENFORCED; with everyone having a job that affords them the ability to participate in their city's government to keep their area
	Everyone in our community has access to clean air, good paying jobs, healthcare, eliminate food insecurity; End housing segregation in our city by creating inclusionary zoning that welcomes all
	Political leadership that works for the people and accurately represents the people
	Develop standards for community policing and spread out low-income residents throughout the city
Citywide (Virtual)	We should ask ourselves how does an area become hazardous and polluted?
	low income housing.
	People buy homes or rent in hazard/pollution areas because they are less expensive. We can add a tax for those areas to prevent them from becoming economically attractive and use that money to fund...
	By addressing community needs with development and land use and decisions addressed by the previous answers and distributing resources EQUITABLY around the city we will have made a huge impact in shifting the way our city and local economy operate and serve our residents
	By doing away with areas that are "hazardous and dumping grounds for polluters"
	build houses and jobs for current residents. no more displacement, outsourcing, or brain drain
